*Hon. Henry R. Westenra.

Lord Marcus Hill.

George L. Dawson Damer.

A FROM FRESH UPON THE carbons of the sun will issue at a few months, a new body of fuel, which will be the most valuable and the most useful of all the known substances. It will be a fuel that will be cheaper than the coal of the ages, and will be the most convenient and the most efficient. It will be a fuel that will be the most economical and the most healthful. It will be the fuel of the future, and it will be the fuel of the world.

TO THE PUBLIC.

By the Grace of God.

HAVING thought upon the circumstances of the late company, and in the conduct of his affairs, and in his death, on the 15th instant, the board of the company, and the other shareholders, therefore, agree to the following plan, and hereby submit it to the public for their consideration and acceptance.

I have the honour to be,

Kilrush, 14th May, 1879.

George L. Dawson Damer.
