

men, ready to march into Portugal.

The Navy Board and the Victualling Board terminated their existence on Saturday, when the patents by which they were constituted expired. In future, the business appertaining to each of these establishments will be transacted at the Admiralty, by which an immense saving will accrue to the country. This desirable change has been effected by his Majesty's Government.

The Paris Papers up to yesterday's date contain intelligence from various places in La Vendee down to the 8th instant, which refute the statements so confidently put forth of the suppression of the insurrection in that quarter. It is admitted that the insurrection movement is decided throughout the whole of La Vendee, and becomes every day more extensive. The bands of the Chouans daily increase in number; some of them amount to not less than 1,200 men, and so great is their activity and force, the National Guard in some places is unable to restrain them. Their chiefs are mounted, and priests serve among their subaltern officers. The influence of the French Priest over his flock, of which the Chouans are composed, is not much less perhaps than the influence of the Catholic Priest in Ireland; but the Chouans must not be compared with the lawless peasantry of that country. They are soldiers as well acquainted with the use of arms as the troops opposed to them. They are also supported by individuals of rank and intelligence, and influential persons in their neighbourhoods: they have an experienced commander for their General, an heroic Princess, the descendant of a long line of Kings for their head in the person of the Duchess of Berry, the mother of the youth, whom they consider their legitimate Prince, and in support of whose rights they have taken up arms. A Proclamation by this bold and enterprising woman was widely circulated in Nantes on Wednesday night, in which, after reciting her landing in the South of France and her passage through the country, she urges the heroes of La Vendee, at whose head she has placed herself, to exert themselves in the cause of France and her son. The report of her having quitted the country and sailed for Holland thus appears to be as unfounded as that of the suppression of the insurrection. Nothing short of a general devotion among the inhabitants of La Vendee to her person could have saved her so long from the active measures adopted by the Government for her apprehension.

A late ordinance of the King of France has fixed the salaries of some of the principal members of the hierarchy of that kingdom as follows:—Archbishop of Paris, 40,000f. (£1,600); Provincial Archbishops, 15,000f. (£600); Bishops, 10,000f. (£400). The King has sent 50,000 francs to be distributed for the benefit of the wounded in Paris, the money is to be distributed at the discretion of the Ministers of the Interior and War departments.

By the Leeward Islands mails we have received West India papers to the middle of last month.—The news from St. Lucia is of the most disagreeable description. The Governor had put several of the principal planters to jail, on account of their non-compliance with the orders in council. His Excellency in the first place appears to have acted with great moderation. Being the season for securing the sugar crop, he allowed that the negroes should work twelve hours per day, in place of nine, the time limited by the orders in council. The Protector of Slaves instantly took alarm, protested against the proceedings of the Governor, and threatened to leave the island; the Governor was then compelled to attend to the letter of the law.

DUBLIN—JUNE 15.

There were 9 deaths of cholera in Dublin yesterday, and 34 new cases. There were but eight new cases in Drogheda yesterday, and no death.

Stock-purses have been formed in several baronies in the county of Wexford, to resist the demand for tithes.

The Clonmel Independent Club have pledged themselves by resolution, not to hold any intercourse whatever with persons who may purchase at any tythe sale.

Tuesday Mrs. William Parsons was brought by writ of Habeas corpus from the bridewell of Birr to the Court of King's Bench, and the Chief Justice ordered him to be remanded to prison in default of bail for having written a threatening letter to the Earl of Rosse.

Yesterday the Proprietors of the Waterford Chronicle pleaded Guilty in the Court of King's Bench, in a prosecution for a libel on the Church instituted by the Attorney General.

On Sunday, the New Wesleyan Methodist Chapel in Wine-street, Sligo, was opened for the first time for Divine Worship, in the presence of a very crowded congregation. The house is capable of accommodating between 1500 and 2,000 persons. A very appropriate sermon was preached on the occasion by the Rev. Mr. Murray, of Antrim; and in the evening the Rev. Mr. McAfee of Derry, addressed a crowded congregation.

The Town, Saturday, Paper promises in one of its next numbers a map of England under the Reform Bill, prepared from the Ordnance Surveys.

The Consistorial Court has ordered a divorce between Mr. Storey, an Attorney of St. Alban's, and his wife, the mother of seven children, for intriguing with her husband's nephew, a youth of 19 years!

William Young a Policeman was committed from Mary le bone Police Office yesterday, for robbing a female of her reticule and a £5 note.

N. B.—There was an error in the return of St. Mary's, the deaths are three, and not five, as stated in the report.

We have the pleasure of drawing a favourable conclusion from the above return, for compared with the preceding day there is a decrease of one-half in the number of deaths, and likewise a considerable reduction in the amount of new cases admitted. There is besides a most gratifying improvement in the health of St. Mary's parish, a very poor and populous district, where the cases in Hospital are now few, and the casualties much less. We anticipate with some confidence that we have after yesterday viewed the worst side of this terrific picture, and that the pestilence, which has made this year a memorable epoch in the annals of Limerick, will soon take its departure for ever, leaving, unhappily, sad and desolating marks on its career through every class of our population.

We have received the following from a Correspondent at Rathkeale, dated yesterday. The proceedings resorted to there have no precedent in any part of Ireland visited by Cholera, and we have no hesitation in pronouncing them to be most arbitrary, cruel, and illegal. The plea of contagion upon which they are apparently founded, is discredited by all the faculty versed in Cholera treatment. We presume the next step will be to arrest the course of his Majesty's Mail-Coach through that town:—"I beg to inform you that on yesterday, at the Court-House in this town, the Board of Health, and the principal inhabitants, came to the following resolutions:—That no bedding, furniture or clothes, of any description would be allowed into the town from any place infected with Cholera, no matter to whom they belonged, and Watchmen have accordingly been placed upon all the approaches to the town for this purpose.—On yesterday, under the orders of the Officers of Health, a bedstead, bed and bedding, with a large bundle of wearing apparel, that had been brought from Limerick, were burned in the Market-place. The inhabitants are determined not to suffer strangers to take up a temporary residence in the lodging houses, and several were obliged to quit the town last night. Several carriers, returning from Limerick to Newcastle with goods, were stopped, and would not be allowed to pass through only for the remonstrance of the Chief Constable, in consequence of their not having had any previous notice."

Captains Mansel and Wollaston's troops of the 6th Enniskillen Dragoons, proceeding from Longford to Cahir, arrived at Templemore on Tuesday last, and when within 8 miles of the town, one of the privates, who complained of having been rather unwell previous to their leaving Roscrea, where they had been all night, was attacked with violent Spasmodic Cholera, and obliged to be removed from the baggage cart to a small cottage on the road side. The Surgeon and Assistant-Surgeon of the 74th Regiment immediately proceeded to the spot, as also Dr. Kingsley, and Mr. Deighton, of Templemore, and rendered him every assistance they could possibly devise, but notwithstanding the man died about one o'clock next morning. The unfortunate patient had the benefit of constant Medical attendance until his dissolution. The people of the neighbourhood, on hearing of the arrival of so unwelcome a visitor as Cholera amongst them, became highly excited—several collected round the cottage where the sick man lay, and threatened to burn it to the ground, and in all likelihood would have put their threat in execution were it not for the guard of Military and Police stationed there. The body was interred early in the morning, and no sooner had the Police removed, than the cottage was reduced to ashes. We are happy to say that no other case of Cholera has made its appearance in that place since.

The Ladies' Committee, formed for the purpose of procuring Clothing for the Convalescent Patients discharged from the Cholera Hospitals, acknowledge to have received the following sums:—From the Ladies of Limerick, £77 18s. 4d.; from Mrs. Leahy, of Cork, £10; from the Relief Committee, £25. Total, £112 18s. 4d. Expended in Clothing, £91 18s. 4d. Balance in Treasurer's hands, £21.—Articles of Clothing delivered to the Relief Committee: 263 flannel petticoats, 104 flannel shirts, 170 flannel waistcoats, 24 men's suits, 50 calico shirts, 72 calico shifts, 36 gowns, 21 bed-gowns—740 garments.

We have received a fourth list of subscriptions to the Relief Fund at a late hour this day, but they are so numerous we must postpone them to our next.

We have much concern in stating that Doctor Casey, one of the attendant Physicians was attacked by Cholera, in St. John's Hospital last Thursday.—He was removed by his own desire to Barrington's Hospital, where he receives utmost attention from his medical brethren.—Dr. Casey, continues seriously ill.

The Board of Health at Killaloe have received from C. W. Williams, Esq. twenty-five pair of excellent Blankets, to be distributed amongst the poor of that town. This benevolent gentleman also contributed largely to a fund raised there some time since, for cleansing and preventing the approach of cholera.

CHOLERA IN ENNIS.

On Monday we merely mentioned the fact of the appearance of Cholera being recognized in this town, and made as light of the situation we were placed in as we could do consistently with the truth. The present state of the town is now, however, on record, and we are obliged to be, although more circumspect than others, equally minute.

The truth is, that we are, at the moment we write, surrounded by the dying. The town never presented such an appearance on a Sabbath Day, when every description of business may be supposed in abeyance, as it now does: the houses are closed; as to markets, we have not any, and the streets are almost deserted; there were one hundred and 27 houses closed in town on Wednesday evening, the inmates having fled in every direction to the country, wherever they could procure a roof to shelter them.

COUNTY LIMERICK SESSIONS.

Dublin Castle, 13th June, 1832.

Sir—I am commanded by the Lord Lieutenant to acquaint you, that in consequence of Cholera prevailing in the City of Limerick, as well as in the surrounding neighbourhood, it is deemed expedient that the holding of the Quarter Sessions for the County of Limerick should be adjourned for one month. And I am to signify his Excellency's desire, that you will give public notice, with the least possible delay, of the Adjournment of the Quarter Sessions for the period mentioned.

I have the honour to be, Sir, Your most obedient servant,
W. P. CRUISE, Esq. Assistant-Barrister for County Limerick.

who are seen in apparent good health in the morning are in their graves before the sun sets. The Members of the Board are assiduous in their attention to the wants of the people.

This disease has reached all round us. There are three cases reported at Six-mile-bridge, and in the village of Clare, within two miles of Ennis, the number of deaths reported is frightful. The families are deserting the village with a rapidity that is truly astonishing.—*Clare Journal.*

Official Report of Cholera in Ennis from Wednesday to Thursday.—Remaining at last report 22; died 9; recovered 1; new cases 16; remaining 28; total cases 117; total deaths 53.

In Ennis the personal exertions and advice of Dean O'Shaughnessy have been unremitting, both in and out of Hospital. The laudable example thus given has been attended with the best results; having imparted a degree of confidence to the inhabitants, and enlisted the co-operation of others, whom terror had paralysed.

The populace rose on Monday morning at Newmarket-on-Fergus, and endeavoured to arrest, by force, the Mail-coach Office Caravan, and prevent it travelling between this City and Ennis, for fear of spreading Cholera. The interference of Captain Dyas and the Police enabled the Caravan and Passengers to resume their route, but they were not allowed to change horses in the town.

We have this morning received further accounts from Ennis and Clare, where the Cholera yet rages with frightful fury. There is an apparent decrease of cases and deaths in Ennis, but in the town of Clare there were 14 new cases and six deaths yesterday—total in Clare 40 cases, and 30 deaths. There have been altogether upwards of 80 cases of Cholera in the 68th Regiment in Clare Castle barracks, but the fatality is not great. It is reported the Military will be unarched out of barracks and encamped. A quantity of the barrack furniture was thrown out and burned. We regret to state the Cholera has made its appearance at Newmarket-on-Fergus, where 3 cases and one death were noted yesterday.

Ennis, June 16.—Official report of Cholera cases.—Remaining 24, new cases 14, deaths 10, recovered 5.

THE CHOLERA IN CORK.

Of the epidemic we wish we had more agreeable facts to state. Such facts as present themselves, however, we lay before the public—speculation about such a subject, is fruitless—perhaps presumptuous—God's Will must be patiently submitted to. On Tuesday the return gave 35 cases and 11 deaths. The following was the report of Wednesday—new cases, 33; deaths, 16. The deaths on yesterday evening, in Cork, were 7, and new cases 24.

Since the introduction of Cholera into the County Gaol in Cork, a novel method has been adopted to prevent its spreading. A musician is engaged to play for the female prisoners (to whom the epidemic is entirely confined) for a few hours every evening; they are all brought together into one of the largest apartments of the prison, and such an interest excited amongst them by the music, and the dance, that they appear to forget altogether the Cholera and its terrors. This mode of prevention was suggested by the idea, that as fear is a predisposing cause, nothing could tend more to diminish its influence. The same method has been tried at the Convict Depot, and with success.

A vast portion of the country extending from Cork to Kildorrery, and including White Church, Mallow, Buttevant, Charleville, Kilmallock, Kilmone, Mitchelstown, Ballyporeen, Lismore, Kilmorth, and Fermoy, is thrown into a state of active movement, and on Saturday morning last, a spectacle was presented of congregated thousands, mysterious, and formidable. The professed cause was to distribute holy ashes among the farmers, which the deluded country people had been taught to believe was bestowed upon a Priest by means of supernatural agency, as a charm against the prevailing disease. It is computed that not less than 60,000 persons were in motion from one o'clock to six on Sunday morning.

In Tralee the cholera abates fast—only one death yesterday, no new cases, and seven recoveries. Total cases, 177; total deaths, 60.

A stout healthy man named McDonnell, near Dingle, was attacked on Sunday last by all the symptoms of the prevailing epidemic, and died on the following morning. Doctor Blennerhasset has declared his case one of decided cholera. Killarney was never in a more healthy state than it is at present, even fever, which heretofore raged violently at this season of the year, is hardly thought of at all now. A second supply of straw has been issued to the poor, and their houses whitewashed a second time.

Barbort Board of Health.—Rev. Richard Fitzgerald, Rev. Fitzmaurice Sandes, Rev. Francis C. Sandes, Rev. Daniel McCarthy, C. C. Rev. Henry Lucy, Thomas W. Sandes, Deputy Lieutenant, William Sandes, Pierce Leslie, Wm. Sandes, jun. J. P. Daniel C. Hartnett, J. P. Richard Leslie, James Fitzgerald, William Kennedy, (Surgeon) Esqrs.—Officers of Health.—Messrs. Uriel Green, John Gallagher, Edward Fitzmaurice, Gerald McCoy, Emanuel Harman.—They prevent the introduction or landing of any furniture, luggage, or other goods, by land or water, from the City of Limerick.

The Cholera has again made its appearance in Belfast,—6 new cases are reported to have occurred. In the county of Galway it has spread to Tuam.

Monday morning last, a crowd of peasantry rushed into the streets of Waterford, with terrific faces, carrying bits of burned stick, and informing the inhabitants that the City would be burned by miraculous fire from Heaven before noon. The Roman Catholic Chapels were full of people the whole day.

Between four and five o'clock on Monday evening, innumerable messengers, breathless with expedition, some on foot and some on horseback, entered Kilkenny from various parts of the country, each bearing in his hand seven small bits of blessed turf, and declaring that the cholera had broken out in that part of the country from whence he came, and was laying waste whole districts.

The Rev. T. Enright gratefully acknowledges the donation of Ten Dozen of Chemises from Miss Lyons of Croom House.

The Bishop of Limerick has sent the munificent donation of £100 to the Relief Committee in this City, through the Rev. J. W. Foster, L.L.D.

Mrs. Gabbett acknowledges to have received the sum of Fifty Pounds from Major Henry Leslie, of the County Fermanagh, per Doctor Wilkinson, to be expended by her in charitable purposes.

Samuel Evans, Esq. Mallow-street, has given two loads of hay to St. Mary's Cholera Hospital, for which the Officers of Health return thanks.

Mr. Allen, of Barrington's Hospital, acknowledges to have received from William Hunt, Esq. of Friarstown, one load of straw for the use of that Hospital.

An important notice relative to the Clergy Relief Fund appears in our columns.

A Soup Kitchen for the parish of St. Michael's, is now opened at the Hibernian School, St. John's Square.

ing them for some time, he was fired upon; and the attack was continued with stones, the marks of which are yet to be seen on the sentry-box. The guard was instantly turned out, and several shots were fired at the assailants, who immediately disappeared. It is supposed that the party who attacked the sentry contemplated robbing the magazine.

On the 1st of January last, our army was distributed as follows:—

	Cavalry.	Guards.	Infantry.
In England and Scotland	5751	4452	18569
In Ireland	2626	745	19428

Making a total of 51,571 men under arms in the United Kingdom; in addition to which the military staff amounts to 2697; the volunteers of England and Scotland to 20,369; and the yeomanry of Ireland to 31,422. At the same date, we had at Gibraltar 4877; Malta, 2366; Ionian Islands, 2889; Cape of Good Hope, 1725; Coast of Africa, 255; Canada, 2417; Nova Scotia, 2258; Bermuda, 962; West Indies, 7574; New South Wales, 2530; Mauritius, 1445; Ceylon, 3547; making a total force in our colonies of 30,853 rank and file; while in India we had 18,364 rank and file.

We are happy to learn that Mrs. Townley is greatly recovered from her illness. The following notice affixed to the street door, to save inquiry at the bell, has been read by numbers of kind and anxious enquirers—"Thank God! for a decided improvement during the past night"—Saturday morning.

There have been 32 deaths in 61 cases of cholera at Tullamore.
