ety is the foundation and key-stone of this
he stateliest vessel that ever British grows

for the sum of 850*l.* in lieu of tithes.

The Provision Contract for the season is just advertised, and from its extent must advance the prices at fairs and markets, besides improving the value of the stock on hands—13,000 tierces of beef and 16,000 tierces of pork must give a proportionate stimulus to the merchant and jobber, presenting a great encrease over the contract of last year.

ST. JOHN'S FEVER HOSPITAL.

By the annexed statement for the last six months, the public will perceive the alarming increase of Fever in this City and its vicinity. Were it not for the great facility of admission into this invaluable institution, contagion must have spread its ravaging influence amongst all classes of society. The applicants for admission were so numerous for the last few weeks, that it became expedient to discharge all the lock patients, to afford inward accommodation. The funds are in a very exhausted state:—
