On Friday Mr. James L. Rathbone, owner of estate, bathing in the river Brosna, near Kiltbeggan, was saved by Mr. P. Rowan, who brought him twice over water at the imminent risk of his own life. The receipt of the customs revenue at Waterford, in the half-year ended the 5th July, exceeds that of the corresponding half-year by £15,000. Dr. Dempster, jun. of Nenagh, is elected to the Moneyers Dispensary. The Munster Repeat Meeting is to be held at Thurles. Mr. O'Connell is to attend. The extortion practised upon the many visitors from Limerick to Kilkee, upon the arrival of the *Garryowen*, and *Dover Castle* steamers at Kilrush Pier, upon a very recent occasion, when the car drivers advanced the known charge of 4s., to 6s., 10s., and even 15s., which was absolutely paid for the run to Kilkee, has raised a feeling of dissatisfaction in the public mind so strong as to prejudice the owners of these vehicles most seriously in general estimation, and it must also peril the welfare of this favourite watering place. Any proprietor of a lodge countenancing, by his car driver, such gross imposition, will find that he not only does an injury to himself, but to the multitude of natives who benefit in the large expenditure made there every summer by families who resort for sea bathing. Instead of co-operating with the liberal example of the Steam-rocket companies, who give every facility of transit, these persons directly oppose an obstacle to all further progress, and will thus again divert the current of public favor to Miltown, Lahinch, and other places equally desirable, such as Killard, Ballybunnion, &c.

Patent Screw Propeller. THE Subscriber has to intimate that he has been appointed Agent for Limerick and the Shannon, to the Company, which has been formed to introduce, under letters patent, Mr. F. P. SMITH'S invention of the Screw Propeller. The first application of this beautiful invention, on an extended scale, was made to the Steam Yacht, "Archimedes," a three-masted schooner of 237 tons, and detailed accounts of her experimental trips have appeared in most of the Papers and scientific Journals. Some of the prominent advantages which the Screw offers over Paddle-wheels, as proved in the case of the Archimedes, are—The vessel can be put about in twice her own length. The action and power of the Screw not materially affected by any inclination of the vessel. When the vessel is deep in the water the power of the Screw is increased, as it moves in a denser medium. The vessel's breadth is not added to in navigating crowded rivers, canals, docks, or basins; or in riding at anchor. There is no agitation of the water to injure or endanger boats, or the banks of rivers or canals. There is less danger of passing close to floating bodies during the night. Sail can be carried on a steamer having the Screw, as well as on any other ship, and thereby, in case of a favorable wind, saving fuel and increasing speed. The strain on the Engines is more uniform and steady, tending to diminish the wear and tear of both Engines and Vessel. The Subscriber will be prepared, in the course of the present week, to give every information on this subject, and to display Plans and Estimates of the cost, both in reference to machinery and license. ARCHIBALD DOUGLAS, 14, George's-street. August 19.

LANDS IN WESTERN AUSTRALIA AND THE PROVINCE OF NEW BRUNSWICK. THE Subscriber has been instructed to offer for Sale Lands in Western Australia, and the Province of New Brunswick, in British North America. The LANDS IN WESTERN AUSTRALIA belong to the Western Australian Company, which has just been formed to co-operate with her Majesty's Government, in applying to this part of New Holland those principles of colonization, which have had such eminent success in Southern Australia; and consist of extensive blocks of land near Leschenault, in the maritime County of Wellingon; which is beautifully situated on the Inlet, formed by the embouchure of four rivers, which pass through the property, or form its boundary; at the mouth of which inlet there is excellent anchorage; and here the chief town of the settlement, to be called *Australina*, is immediately to be established under the auspices of the Western Australian Company, and in charge of their Chief Commissioner, who, with his family and a considerable body of Emigrants, accompanied by an efficient surveying establishment, and a qualified Medical officer will be dispatched thither without delay. The LANDS IN NEW BRUNSWICK belong to the "NEW BRUNSWICK AND NOVA SCOTIA LAND COMPANY," and consist of 500,000 acres most eligibly situated, in the County of York, in the centre of the Province, and lying between the fine rivers, St. John's and Miramichi. These lands are about 60 miles in length, along the north-west boundary line, and from 20 to 30 miles in breadth, and are equal in fertility to any land in the Province. The Company have already completed a road for sixteen miles to the town of Stanley, situated on the River Nashwalk, in the centre of the tract, where a saw-mill, tavern, &c. have been built for the convenience of settlers. Prospectus, Plans, and every other information connected with these Properties, can be had at the Subscriber's Office. ARCHIBALD DOUGLAS, 14, George's-street. Limerick, 19th August.
