

## TAXPAYERS OF THE LIBERTIES OF LIMERICK.

—Having for a number of years, anxiously to release you from as unjust a system as ever sanctioned by law, I now feel direct your attention to the means of all benefits of that long-withheld measure which you are now about to enjoy. Use of the 3d and 4th Victoria, cap. that the Liberties of Limerick, out-parliamentary Boundary," may now be one barony. This arrangement I conclude to many objections. I was confirmed by a conversation which I had on the late Secretary for Ireland. On that lordship shrewdly observed that as those separated both by the City and River safer and more convenient course for have them merged into the adjoining instead of being formed into a distinct

clause of the above Act consequently so desirable an object. It enacts that it shall either for the Grand Jury, or for 20 tax-payers, to apply by memorial to the Magistrate and Council, in order that certain parts, or any portion thereof, may be annexed to adjoining Barony or Baronies. In pursuance of this provision the Parish of Mungret was annexed for its annexation to the Barony of Mungret, as being the one immediately adjoining to the Barony of Mungret, of which for the last year amounted to £100,000, and I would take the liberty of urging the importance of at once adopting a similar measure will prove equally advantageous to you, and to the country at large. There is another subject of great importance which it is my intention to bring under the consideration of the Legislature, without doubt that it will receive your sanction. I allude to the propriety of abolishing the duties on cattle and agricultural produce, entering into the market for sale. The exaction of toll under such a system has always appeared to me to be a great grievance for by the very act of bringing food for the market of a town or city, we confer upon its inhabitants a convenience for which they ought to feel themselves amply repaid. In all events we deserve a better return for being taxed for the undeniable service of bringing them. They would be more sensible if we were for a time to refuse bringing agricultural produce for sale to their markets. We then have to seek it at much expense. On principle, every facility should be afforded for the free entry of food into a city; and if we are to be told that the streets of a city suffer from its being so crowded, I would reply as before by referring to the objection, to the great, the more than balancing, convenience which they enjoy in bringing their markets at all. Food they must

## INQUEST ON THE BODY OF ANNE DEMPSEY.

The Magistrates held an inquest at Barrington's Hospital on Thursday, on the body of deceased, who was killed by a horse and car, which ran over her.

John Connors sworn—Lives in Bedford-row; was standing at Mrs. Hanrahan's corner on Monday evening; saw a horse with a tax cart gallop past him at a furious rate; it got in between the corner and the lamp-post; the deceased was going across the street at the time, and the horse knocked against her and tumbled her down; it then got foul of some cars in Bedford-row, and witness ran after it and caught the horse. There was no person guiding the horse.

Mr. Philips, of Mount Rivers, Newport, the owner of the vehicle, explained, that he was standing quite near to his horse on Monday evening, when a carman passed by and cracked his whip. The mare immediately ran off, and witness followed her; she went between the lamp-post and the wall, for she made off in the direction of the stable, where she was at livery during the day. He expressed the greatest sorrow for what had occurred, and said he was not aware at the time he left the spot, that anything had resulted from it.

John S. Thwaites, Esq. Surgeon, being sworn, deposed that the deceased was brought into Barrington's Hospital, on Monday night, with a severe injury of the chest and left side, attended with a great extravasation of air under the skin; that she lingered until Wednesday, and then died; on a post mortem examination, it appeared that the injury was a most extensive one, comprising a fracture of the whole of the ribs on the left side, and protruding into the thorax or chest; the lobe of the lungs on the same side was lacerated, and the collar bone was separated from the shoulder, the said injuries were the cause of her death.

The Jury found the following verdict:—"We find that Anne Dempsey came by her death in consequence of injury received by her from a horse and tax-cart running away in George's-street, and striking against her which knocked her down."

Mr. Phillips having given £10 to the daughter of the deceased, and again expressed his sincere regret for what had occurred, the Magistrates declined levying any deodand on the vehicle.

The Burgesses of Cork meet on Tuesday, to form an association to protect the privileges of the citizens.

There is at present in the workhouse of this Union a woman named Mary Scully, who has attained the extraordinary age of 106 years! She is in perfect possession of all her faculties, and converses freely with any visitor who may notice her. She expresses the greatest indignation and annoyance if asked to take a dose of medicine, and has declared that she never tasted any kind of physic within her recollection.

The contract for bread for the Tipperary Workhouse is taken at 2d. per lb.
