FATAL IMPACT

COMMUNISM

LIMERICK LEADER MONDAY, JANUARY 24, 1949

Marshall Plan View For Ireland

Address By Professor Carrigan
He thought Ireland should not be anything but a grass country, and he would be in favour of selling milk a fluid state to the United Kingdom instead of containing it into butter.

Rodine advertisement for rat control with image of a rat and text describing the product's effectiveness.

Things That Matter

DANGER OF COALITIONS
(Dear Sir.—It has become a commonplace that those who want to keep our people from learning about the Communist menace in our midst immediately start a sniping campaign of abuse against anyone who has the temerity to expose the dangers that exist. Very often un-informed people rush in, thus giving point to the Communist boast that for every member of the party there are ten dupes who without realising it are advancing their aims.)
