

Part Played By Limerick In The 1916 Movement

In this, the second, instalment of the paper read by him at a recent meeting of the Old Limerick Society...

The Irish Volunteers were not popular in the city. They could be described as a beleaguered garrison, encompassed by the bleak disapproval of the majority of the citizens...

On another occasion as they were passing the Clare Street Temperance Hall, on a Sunday evening, during a snowstorm...

In fairness, however, it must be recorded that the atmosphere was completely changed in these quarters from 1918 onwards...

The hostility to the Irish Volunteers reached its climax on Whit Sunday, 1915. On that day a parade of Volunteers was arranged...

The parade of Sinn Fein Volunteers in Limerick was for which women were mainly responsible. Companies of Irish Volunteers arrived in the city about noon...

The disturbances in Limerick last Sunday were most regrettable. Violence of a kind is to be expected, but under the circumstances...

"LITTLE MO" VISITS LIMERICK

"LITTLE MO," Miss Maureen Conolly, the 15 years old American tennis champion arrived in Limerick this evening...

At Shannon when she arrived by Aer Lingus plane from Dublin, she was accompanied by her mother, Mrs. Jesmine Conolly...

She said she was first given to her by an American journalist. One time when she played in San Diego, the s.s. "Missouri," known as "Big Mo," attracted more attention than Miss Conolly's tennis.

Miss Conolly's first visit to Limerick was the Limerick Lawn Tennis Club on the Ennis Road.

No Trace Of Missing Dublin Man

Police have not yet found any trace of Mr. Barnet Levitt, a Dublin draper, who disappeared last Tuesday after visiting his wife in Middlesex Hospital...

It is understood that Levitt had suffered from black-out-loss of memory and anxiety over his wife's illness, and over that of a schoolboy son, who has also been in hospital.

Mr. Levitt's car was found parked outside Middlesex Hospital after he had visited his wife in hospital. He had £200 in £5 notes on him at the time of his disappearance.

Tokyo May Have The 1960 Olympic Games

The International Olympic Executive Committee has decided to postpone a decision as to the venue for the 1960 Olympic Games until 1955...

This is regarded as an indication that the prospect of Tokyo being chosen is reasonably good. Five cities applied for the 1960 Games—(I.N.A.).

DEATH OF LORD MUSKERRY

The death of the Right Honourable Sir Robert Matthew FitzGerald Deane-Morgan, Fifth Baron Muskerry, took place on Saturday at his residence, Springfield Castle, Dromcollogher, Co. Limerick.

Born in 1874, he was the eldest surviving son of the Fourth Baron, succeeding him to the title in 1929. His wife was Mrs. Charlotte Irvine, daughter of Mr. John Irvine, Mervyne Co. Wexford.

DUBLIN PRINTING TRADE STRIKE CONTINUES

The strike in the Dublin printing trade still continues. The outlook for an early settlement of the dispute was stated in Dublin to-day to be somewhat remote.

Limerick Rose Greatly To The Height Of A Great Occasion

IT can quite truthfully be said that Limerick rose greatly yesterday to the height of a great occasion. According to all accounts, it catered admirably for one of the biggest crowds ever seen in the city.

Limerick yesterday was subjected to one of the busiest days of its long history, as an estimated 45,000 people flocked to the city to see Gork and Tippin's battle for the coveted Munster senior hurling final.

From early morning cars began to arrive, and by noon every available parking space in the city had been occupied by thousands of them. Gaily festooned cars, with colours of either Cork or Tippin, were to be seen on main streets, side streets, cul-de-sacs, and even along the waterfront.

Thousands of people promenade along O'Connell Street, all of them in happy mood as they wore colours of the team they had come to urge on to victory. Many of them wore colourful paper hats, with either 'Up Cork' or 'Up Tippin' on them. The city churches were packed to capacity as visitors flocked to hear Mass before having a meal prior to going to the Gaelic Grounds.

The Limerick city bus service was specially augmented to carry the crowd of match-goers from William Street corner to the Gaelic Field. More than 32,000 passengers were carried to the field in these buses. Those who could not get seats in these buses cheerfully walked to the Gaelic Grounds.

The catering establishments served cold meat lunches and teas, but some served hot lunches also. Mrs. Joan McMahon, proprietress of the Hazel Restaurant, O'Connell Street, told our reporter that her establishment was never busier than yesterday. When he spoke to her she was unable to give an estimate of the number of hot meals served yesterday, but she said that the figure was well over a thousand.

Guest houses had similar accounts. As they concentrated on their meals and between them served many thousands.

Small shopkeepers took advantage of the large invasion too. They concentrated on selling sandwiches and minerals. All of them report that business was excellent. Even the catering establishments served cold meat lunches and teas, but some served hot lunches also.

Hopes for a settlement had been raised by reports from Washington that Government officials had approved a steel price rise of about \$3 dollars a ton to compensate the industry for the demanded wage increases of the strikers.

To date the strike is estimated to have cost America \$714,000,000 and to have thrown 795,000 men and women in other industries out of work.

Attendance And Gate Receipts

The takings did not constitute a record. The receipts, £6,022 17s. 10d., were about £200 less than the record figure realised at last year's Munster finals at the same venue.

The reduction in yesterday's gate receipts as compared with 1951, is mostly accounted for by the fact that the sidelines were closed earlier than usual in order to allow each spectator the maximum comfort. The number who passed through the sideline turnstiles was 14,343, as compared with an approximate 16,500 last term.

The ground was by no means full, especially on the embankments where there was accommodation for several more thousands of spectators. At no time were the admission gates closed.

The Earliest Arrivals

First arrivals at the ground after the 12 o'clock tea were a party of Clare hurling enthusiasts living in Dublin. They left the capital at 6 o'clock yesterday morning and arrived at the ground at 10.30 a.m., where they prepared their breakfast. From the first onward followers of the teams began to stream to the Gaelic Grounds.

THE CORK FOLLOWERS JUBILANT

As the visitors made the trek to the railway terminus it was obvious that the temporary supporters were saddened by the defeat of their champions. On the other hand the Cork followers were jubilant and proudly wore the red and white favours. As the Leasiders marched through Davis Street, in spirited and delighted style, and now again the enthusiasm reached crescendo point with shouts of 'Up Cork!'

Outside the Railway Hotel, where the Cork team and officials stayed, many Cork supporters gathered to cheer their favourites. Now and again some of the Cork hurlers appeared at the windows of the hotel to acknowledge the vociferous calls of 'We want Ring,' 'We Want Dowling,' etc. In the footpath outside the hotel a Corkman with his accordion played waltz tunes, while a couple displayed their jubilation by waiting to the strains of popular airs. Such was some of the revelry that marked a great day once more for Rebel Cork.

Guest houses had similar accounts. As they concentrated on their meals and between them served many thousands.

Hopes Of A Settlement In United States Steel Strike

Pittsburgh, Pennsylvania, Monday. New suggestions for settling the 42 days old United States steel strike have been made to the Unions and Steel Companies and are now awaiting Union reaction.

The last time the Communists requested a recess the request was followed by a new charge that between February 29th and July 10th American planes flew over the West Coast, but an official Chinese claim that some planes dropped germ bombs.

The North Korean General, Nam Il, protested to-day against an incident in which a Communist prisoner was killed and seven injured.

CLARE COURTS FOR AUGUST Justice Gordon Hurley announced at Ennis Court on Friday that during the month of August only two Courts would be held in the county, one at Ennis on 1st August and the other, also at Ennis, on the 22nd August.

DEATH CAUSED BY MERCURY POISONING

DEATH from mercury poisoning, but that there was no evidence of how or by whom it was applied, was the inquest verdict in Ennis this evening on Patrick Joseph Kiernan, 30 year-old shoemaker and hackney owner, Kildysart, Co. Clare. Kiernan died over two months ago from an irritation of the skin after he had applied a lotion for which he suffered on and off for the previous four years.

The inquest was opened in April and in the preliminary hearing evidence was given that death was caused by failure of the kidneys and the liver following the absorption of an irritant poison. The inquiry was then adjourned for microscopic and chemical examination of certain parts of the body.

Mr. I. M. Horgan, solicitor, who represented Crowley, said he didn't want to criticise the procedure adopted by the Guard, but it was a pity that the statement of a dying man when reduced to writing might not be signed. Mr. M. J. Walsh, State Solicitor, said the unsigned declaration of a dying man could be given in evidence in a Court of law.

Anti-Partition: Two Meetings In Limerick

On yesterday at 12.45 p.m. a meeting of the Anti-Partition Organisation was held at O'Connell Monument, Mr. Michael Hartney presiding. It had been intended to hold a meeting on Saturday but circumstances arose which made it impossible to do so.

At the close of the meeting, which was ended by the playing of the National Anthem, several people handed in order books to officials and paid membership fees. At 5.30 p.m. a further meeting was held at Bedford Row. The same speakers, as well as two other members of the Anti-Partition Organising Committee, spoke and a large number remained throughout the entire proceedings and as in the earlier meeting, quite a large number were enrolled as members. In the near future a Branch will be formed in Limerick, and a public meeting will be held at which it is proposed to have speakers from the North-East to corner of Elster, including M.P. Mr. Liam Ford presided at the Bedford Row meeting.

Committed To Prison For Failure To Pay

Thomas Coffey, cornermaker St. Ennis, was at the Local District Court on Friday sentenced to one month's imprisonment for failure to comply with the terms of an instalment order granted to Messrs. Williams & Co., Waterford. Evidence was given that the firm's unpaid judgment against him for £144, the amount of the original debt, and defendant had been ordered to pay it in three instalments of £3 a month. That order had been made in December 1951, and so far only £6 10s. had been paid.

THREAT TO TRADE RECORD IN UNITED STATES

A threat of trade in the United States was published yesterday in the U.N.I. States Congress Organisations. The organisation's given in Economic published by C.I.O.

DEATH OF MISS RYAN

We regret to announce the death of Miss Mary Ryan (nely) wife of Mr. John Ryan, which occurred at Clonsilla, Villars, Co. Limerick, yesterday. She was 68 years of age and was a native of Limerick, where she lived in the highest very wide circle of friends. Her husband, one of our citizens for 40 years, is a composite player in the 'Munster Messrs McKerr's' and other relatives' path will be a bereavement to all who knew her. The remains will be laid to rest in the cemetery at Penhywell to-morrow evening at 8 p.m. They will rest in St. Michael's Church, Penhywell, Co. Limerick, on Wednesday.

GLIN DOMESTIC ECONOMY CLASSES

The Domestic Economy Classes at Glin by Miss Marian Barrett, Instructors, were brought to a close by a most pleasant party (writes our Glin correspondent). The beautiful articles made by the classes were exhibited, and the Glin girls were warmly congratulated by Rev. Fr. Ryan, M.P., and others present. Glin young girls got a great opportunity to acquire a knowledge of how to make and to know what to do in the matter of housekeeping. The girls were very proud of the exhibits, which is highly praised by the exhibitors.

Better Disease Lower GREAT progress been made in a result, a very great and a big decline from an interesting (representing the at the Irish Junior Technical Institute Mr. Kennedy, who is the Secretary, spoke being made by it means of propaganda the people on health n older persons, he said member when Mr. commorplace in Ireland as it is now, a rarity; occurred in the West every year, taking an person. Of more recent number of cases of th the number of death a dramatic decline. I were 2,087 cases and 2 1951, the latest year statistics are available and figures were 8 deaths. OF THE GREATEST "It is difficult," w Kennedy, "to estim the value of those ad the country but there that they have been of benefit to it. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted these diseases during the mortality particularly among members of the comz and greatly to th persons capable of p ductive work. The incidence of the various diseases has penditure of consider money in the previus accommodation and i it has also obvi of output due to the work of persons w tracted
