"Indispensable" -a word largely used in these days - may be said to accordingly express, in so far as any single word can, what is the careful and considered conclusion which has been arrived at by many people who use Beecham's Pills. They somether that Rescham's Pills are "indiagennable" to their health, and, as a matter of course, to their happeness; and they never allow themselves to be without a supply of this valuable medicine in their homes. This letter is an accelient idea, sad one worthy of imitation for there is no doubt whatever, that, as a prevenlive medicine - one that may be taken with confidence when perhaps only an "out of sorts" feeling is experienced and before any definite atheent has developed. Beedham's Prils are a positive team. They do good all round; they tone up the symman, correct the aution of the

liver, regulate the termels and are a percental agent in pordying the blood. It is certainly a good plan never to be without BEECHAM'S PILLS

there is this year an increase in the number of women emigrants. Were it not for this the total who left the country during the five months up to the end of May would show a more substantial decrease still than that recorded. degree of prosperity and continues to progress all concerned in its success. This is clearly shown by the report and balance sheet to be submitted to the shareholders at the half-yearly meeting to be held in Dublin on Wednesday next. The net profit for the half-year ended on the 30th of June, exclusive of the amount brought forward from the previous account, amounts to the substantial sum of £55, 377. Out of a gross profit of £61,679 14s 5d the Directors have declared a dividend for the half-year at the rate of 124 per cent per annum, less income tax. The sum of £21,000 is appropriated to writing down the Bank's investments and £13,679 is carried forward. The total of deposit receipts and current and other accounts is close on 27,000,000, or an increase of £102,000 over the figure for the corresponding half of last year. The liquid assets under the heading of cash, mon's acuall, and investments total \$4,581,141, an increase of £386,061 over the sum recorded on the 20th June, 1915. This figure represents over 52 per cent of the Bank's liabilities to the public. The foregoing figures conclusively indicate that this thriving institution, which has 92 branches and sub-branches throughout the country, is steadily progressing and is in the enjoyment of a healthy state of prosperity on which directors, shareholders, and officials

CASES FROM CITY AND COUNTY

Mr Justice Ross, who was accompanied on the bench by the City High Sheriff (Mr T S Lawlor, BC), resumed the hearing of appeals in the Limerick Record Court on T needsy. Fitzgerald v Whelan, This was an appeal by James Fitzgerald from a decision of the County Court Judge dismiss-ing an action against John Whelan, the defening an action against John Whelan, the defendant, to recover £20 damages for obstructing a watercourse through his lands at Cragnacree, and turning the water into plaintiff's lands. Mr B J M Elligott, K C, and Mr P Kelly (instructed by Mr T H Kenny, solicitor), appeared for the appellant, and Mr E J Phelps (instructed by Messrs J Binehy and Son, solicitors) for the recondent. tors), for the respondent.

The appellant's case went to show that the watercourse had been the subject of considerable litigation. At the beginning of this year the stream was diverted by the action of the defendant, with the result that it caused a flooding of the lands and considerable damage. The defence was that nothing had been done to cause flooding.

His Lordship held that defendant was responsible for the flooding. He reversed the fecialon of the County Court Judge, and gave

sister that if anyone called and claimed it to hand It over. Informations were refused. Mr Power defended. Thomas Woods was charged by Sergeant O'Grady, Inspector under the Food and Drugs Act, with having sold him milk deprived of a

percentage of its fate. The defence was that it was sold as it came from the cow, and evidence was given to the effect that at this time of the year if milk were left stationary for a short time the cream would rise to the top and be given out to early customers. It was further stated that this was a small quantity left after the costomers were supplied, and was naturally poorer in quality for the reasons stated. The case was dismissed.
