## FORECAST.—WEATHER ON THE WEST COAST.

EDITOR OF THE LIMERICK CHRONICLE  
 —Your weather prophet has certainly predicted the weather just as it has occurred. Example, on Wednesday, 6th, it was calm all day till the afternoon, when the wind shifted to a southerly point; later on it became fresh and breezy, and afterwards wind increased and rain poured down rather copiously. On Wednesday night a gale set in, with gusts at intervals, which one would rather expect to be beating on the window panes than to be blowing in the open air, having the rain forced through one's clothing, and no garment could resist it. This day (Thursday 7th) high winds and cold showers driven along with much force, and in some cases hail mixed with the rain. The sea for some days, even in the calm weather, has been very rough, and moaned and howled. Distant objects appeared nearer, which is a change in the weather. Altogether it has been a rough time of it. However, the breeze is fresh occasionally, while the breeze is fresh and with foam as far as the eye can penetrate.  
 —Yours, &c.,  
 H.B.H.

September 8th, 1905.  
 —Your weather prophet said there would be a cyclonic disturbance around 8th. I have predicted it up to the 7th how correct he is. Last night that is the night of the 7th, the fair spell of the early part of the day was succeeded by wind and rain, and all this day, that is the 8th, we are having a gale and showers at intervals. I don't think that one would not like to encounter it. The wind flows south westerly, and notwithstanding this disturbance, I have seen at an hour a number of ladies, like mermaids, bathing with the waves dashing over and around them, and all evidently enjoying themselves in the storm-tossed sea.  
 —Yours,  
 H.B.H.
