Secretary, Mr A. Morgan in
reply to queries on the subject said their present
liabilities were £2,130 over and above £390 to
credit in bank. Since last meeting he had written
to the Department, but they had ignored all his
communications. The Committee had between
£7,000 and £10,000 to their credit on the books
of the Department. It was agreed to have the
whole financial question discussed at a special
meeting on the last Wednesday of the present
month.

SPRING TIME.

The spring is with us when a young man's
thoughts are said to turn lightly to love, but the
practical woman concentrates on new frocks, they
are now within the reach of the average purse,
for those who shop wisely and well. For this
season Mr Cochrane Hamilton reports that Paris
is decked in a uniform of navy coat frocks with
varied embroidery, the predominating colour being
red in all its variations. Knitted silk dresses and
jumpers are still popular, but must be rust or
copper to be fashionable. At 14 Bedford Row
business is brisk with new arrivals daily to tempt
the fashionable. (Advt).
