The new creation of Peers, particularly mentioned in this day's paper, we hear, does not contain the entire number of those on whom the Royal favour has shone; four other Commoners are to be raised to the Upper House—their names are publicly mentioned, though not with an authority that would be justifiable in us to mention them.

Some of our new created peers we hear will not take their seats in the upper House next sessions, in consequence of a derangement in the necessary article of cash.

We can assure our readers from authority, that the Parliament of this kingdom will be dissolved in the course of six weeks.

His Majesty's royal letters patent, it is said, are arrived for granting the following pensions: 500l. per ann. during pleasure, to Lady Viscountess Boyne.—200l. per ann. to Lady Catherine Toole.—200l. per ann. to Lady C. Marlay.

The word Fiat, which is so much admired in the Old Testament, where the Almighty pronounces, "Let it be so, and it was so," as "*Fiat Lux, & Lux fuit.*" "Let there be Light, and there was Light," should not be prophanelly made use of to any term of law-proceeding or process, as it seems sacred alone to the *ipse dixit* of the great Jehovah, when he created the Heavens and Earth, by his bare word or Fiat: An Eastern tyrant, who claims kindred with the Heavens, and asserts his relationship with the sun, moon, and planets, might perhaps adopt such a term in his despotic mandates—but surely no such absolute powers are vested in any subject of these realms, as to admit of such an unconstitutional word, to be annexed to what may officially issue from him.

The Charter for incorporating the Undertakers of the Royal Canal from this city thro' the counties of Meath, Westmeath, and Longford, to the river Shannon, having received the Regal approbation, is now preparing to pass the Great Seal of the kingdom; so that we hope to see that necessary undertaking proceeded on without delay.

We hear, that several of the West India Planters in the small islands of St. Christopher, Nevis, and Montserrat, are about removing to the large and comfortable island of St. Domingo, Martinico and Guadaloupe, were they expect the greatest encouragement from the new, free, and equitable government that will shortly be established in the mother country.

The late unfortunate George Robert Fitzgerald, saved the life of the present popular and patriotic Duke of Orleans, who was set upon, when in disguise at a Paphian Temple in Paris, by two musqueteers, who would have killed him on the spot, had not Mr. Fitzgerald, without knowing him, very opportunely stepped up to his assistance—by this, we may see, that the worst of men may be made instruments, under Divine Providence, in bringing about the greatest events; were it not for the ill-fated Fitzgerald, France, perhaps still, would be a kingdom of Slaves.

The French, ever attentive to their interests, have not suffered the tumults which prevail at home to interfere with necessary business. A correspondent acquaints us, that there are now above a thousand fishing vessels waiting the first approach of a herring scull, between the Old Head of Kinsale and Bandon.

Last Tuesday night, about the hour of eight o'clock, an accidental fire broke out in the Out-Offices belonging to Counsellor Finucane, at Lifford, Co. Clare, which raged with such violence as to destroy the entire range of buildings in less than two hours; however, we are happy to find, that notwithstanding the impetuosity of the flames, the horses, and many articles that were stored therein, were fortunately saved.
