 national insurance, this House is of opinion
 that under Part I. of the Bill public funds and
 individual contributions will not be used to the
 best advantage of those most closely effected,
 and that as the Bill has been neither adequately
 discussed in this House, nor fully explained to
 the country, and would in its present form be
 unequal in its operation, steps should be taken
 to enable further consideration of Part I. to be
 resumed next session, and in the meanwhile to
 have the draft regulations published.
